PRODUCT MANAGER

Hello, I'm Sarah Toll.

I'm an enthusiastic Computer Science student, armed with a strong technical foundation and a knack for bridging the gap between technical complexities and user-centric solutions, who is eager to embark on a dynamic career as a Product Manager. My commitment to data-driven decision-making, agility in adapting to evolving strategies, and the ability to communicate effectively with cross-functional teams positions me to thrive in Adobe's collaborative environment.

Projects

RUN-EZ: PERSONALIZED TRAINING PROGRAM
Mobile app that allows runners at all levels, from beginner to more advanced, push their fitness journey to the next level with easy-to-follow run walk intervals. Documented the feature requirements using the Jobs to be Done framework. Designed and built the app using Swift UI.

SYSTEM ANALYSIS: BRIEF DESCRIPTION OF WHAT IT DOES
Spearheaded the development of requirements and user stories, collaborating closely with a team to craft use-case and sequence diagrams. Orchestrated the creation of class lists, diagrams, and a test-based UI framework, coded in Java to match the specified design.

AMOOZME.COM: MOBILE APP DEVELOPMENT
Mapped out the onboarding journey for an Apple TV app to combine streaming services into one platform. Documented the flow and performed wireframing in Figma.

Experience

LOBLAW TECHNOLOGY: PRODUCT ANALYST INTERN
Toronto, ON: May - August 2022
Designed user-friendly support documentation with 15+ model flows and integrated user stories into Jira for effective communication with the development team. Collaboratively created a Confluence page, including escalation flows, FAQs, and project updates. Managed User Acceptance Testing (UAT) for a multi-year contract, gaining a foundational understanding of the software development life cycle.

STARBUCKS + MERCURYS COFFEE: BARISTA
Toronto, ON + Seattle, WA: July 2018 - August 2023
Mastered the art of multitasking, customer service excellence, and maintaining composure in high-pressure environments while working as a dedicated barista. Developed empathy and a customer-centric focus which fostered a love of the overall user experience.
